WORK EXPERIENCE

Baghdad, Iraq

Lead Front-End developer, BAITY

FAB 2026 - Current

- Lead and mentor a team of 2 frontend developers, ensuring high-quality code and efficient delivery of features.
- Drive the development and continuous improvement of the Baity website and dashboard, focusing on performance, usability, and scalability.
- Contribute to mobile Flutter development by supporting debugging, issue fixing, and feature development.
- Collaborate with designers, backend developers, and stakeholders to implement new features and enhance user experience.
- Review code, enforce best practices, and maintain consistency across the frontend architecture.
- Support backend debugging and API issue investigation using C# and ASP.NET.

Helsinki, Finland

Front-End Developer , SEK OY

NOV 2024 - SEP 2025

- Led technical development of complex web applications, ensuring high performance, scalability, and maintainability across projects.
- Leverage LLMs, prompt engineering, and MCPs to build AI-powered tools for in-house use and for clients.
- Develop and optimize front-end architectures using React, Next.js, React Native, TypeScript, JavaScript, Tailwind CSS, PHP, and CI/CD pipelines for streamlined deployment and testing.
- Collaborate with cross-functional teams to deliver reliable, production-ready solutions aligned with best engineering practices.

Helsinki, Finland

Web Developer, SEK OY

SEP 2021 - NOV 2024

- Built and deployed clients web projects and internal tooling using React, Next.js, WordPress, PHP, and SCSS.
- Enhanced site performance, refactored legacy code, and improved load times and SEO.
- Introduced or improved component reuse, modular architecture, and front-end best practices.
- Supported cross-functional teams with debugging, maintenance, and feature implementation.

Helsinki, Finland

Web Developer Trainee, SEK OY

MAR 2021 - SEP 2021

- Assisted in building landing pages, small websites, and UI elements using vanilla HTML, CSS, and JavaScript.
- Updated and maintained portions of Node.js-based applications.
- Collaborated with senior developers to learn modern frameworks and workflows.

KEY PROJECTS

Baity Website & Mobile App (Core Product Project)

- Led a team of 2 frontend developers to deliver and deploy a fully redesigned version of the Baity platform across the website, dashboard, and mobile app.
- Drove a complete UI/UX refactor, improving usability, performance, and maintainability across the website and dashboard.
- Contributed to the Baity mobile app using Flutter, supporting debugging, issue fixing, and feature development.
- Designed and built a major feature: Chalet Reservation System, enabling end-to-end booking functionality.
- Supported backend debugging and issue investigation using C# and ASP.NET, collaborating with backend developers to resolve integration and API-related issues.

Skills used: Vue, Nuxt, JS (ES6+), Dart, Flutter, C#, ASP.Net, Git, CI/CD, AWS,

Cargo Airline Company Web App

- Designed, developed, and maintained a production-level cargo airline website using React
- Implemented reusable UI components and responsive layouts for cross-device compatibility
- Integrated APIs to display dynamic operational and marketing content
- Improved performance, usability, and maintainability of the front-end codebase
- Skills used: React, JavaScript (ES6+), REST APIs, Responsive Design, Git

Skills used: React, JavaScript (ES6+), Responsive Design, Git, SASS, CI/CD, AWS

HTML Banner Generation System for Airline Campaigns

- Developed and maintained a Node.js application for generating dynamic HTML banners for airline marketing campaigns
- Automated banner creation to support multiple sizes, languages, and campaign configurations
- Integrated templates and data inputs to streamline campaign production workflows
- Improved delivery speed and consistency across digital advertising platforms

Skills used: Node.js, JavaScript, Automation, SASS, HTML/CSS, Google sheets, Gstudio, GSAP

EDUCATION

Ethical hacking, Metropolia Open University	Helsinki MAR 2023 - MAR 2024
• Conduct penetration testing to identify security vulnerabilities • Perform vulnerability scanning and risk assessments • Analyze system, network, and application security weaknesses • Document findings and provide remediation recommendations	
AI development, Metropolia Open University	Helsinki MAR 2023 - MAY 2023
• Develop, train, and evaluate machine learning and AI models • Prepare, clean, and preprocess data for model training • Implement and optimize models using frameworks such as TensorFlow or PyTorch	
Web development, ZTM	Online MAR 2020 - MAR 2021
• Building a Full Stack Project using React.js, Node.js, MongoDB	
Game development, Amiadu	Helsinki MAR 2018 - MAR 2019
• Design and develop multiple game projects using Unity, C#, and Blender	
Bachelor of Computer Engineering, Almamon University	Baghdad SEP 2008 - JUN 2012
• Software engineering, project management, C#	

SKILLS

- Programming: JS, TS, Python, Dart, C#, React, Next, Vue, Nuxt, Node.js, Django, React Native, Flutter, ASP.NET
- Technical/programmatic: Git, CI/CD, Jira, Prompt Engineering, LLMs, Cyber security, Clickapp.
- Platforms: macOS, Windows, Linux
- Languages: English, Arabic, Finnish
- Certifications: AWS Cloud Practitioner Certificate.
- Interests: Video Games, Bodybuilding, Movies
